# FloQast

Start on the path to operational excellence with FloQast.

FloQast automates common accounting workflows, helping to streamline and make teams more efficient. Whether automating the Close, Compliance, FP&A, Reporting, Payroll, Taxes or documentation requests, FloQast's suite of easy-to-use and quick-to-deploy solutions help controllers and their teams take control of accounting operations.

audit readiness

## Visible

An Accounting Ops Dashboard gives teams and managers real-time, top-down insights to monitor goals, tasks, supporting information, bottlenecks, and completion. View by accounting function in a summary or timeline view.

## Automate

Build intelligent checklists to create one source of truth, tracking tasks, due dates, reviewers, and preparers in one central location. Proactive notifications can be simple, reminding users about tasks, when review notes are signed, or complex when a reconciliation falls out of balance.

## Collaborate

Cross department collaboration and visibility have never been easier as tasks, roles, sign-offs, and information are now shared seamlessly across teams. In addition, teams can collaborate remotely, on-premise, or a hybrid work model without disruption.

## Document

Documentation is now centralized and organized the way you choose, creating a single source of evidence—capture notes with feedback and annotations. In addition, store review and sign-off as a historical record for future audit support.
